Backend Developer - Python

Employment Type: Full-Time
CTC: ₹4–6 LPA
Location: Gurgaon

The ideal candidate is a highly resourceful and innovative developer with knowledge and passion for Python. You must also possess a knowledge of web applications.

Skills and Experience Required

- Strong knowledge of Python
- Ability to write unit-tested and maintainable code
- Expertise working with and building RESTful APIs using Python
- Knowledgeable in **Flask** or **Django**
- Experience of working with **LLMs** will be a plus
- Cloud platforms (preferable AWS), micro-services architecture, CI/CD solutions, DevOps principles, message queue systems, and background task management.
- API security frameworks, token management and user access control
- Relational and NoSQL database principles.
- Message queues (RabbitMQ, ZeroMQ, etc)
- Background task processing (Celery, etc)
- (Basic understanding) HTML/CSS/JS
- Source control systems (Git)
- Serving high scale HTTP(S) protocol (Nginx, Apache, etc.)
